Digest

Bulk Agricultural Exports Fall During 1990 (see p. 2). U.S. agricultural exports fell nearly \$600 million to \$39.3 billion, their first decline in 4 years. Wheat exports fell \$2 billion, and other grains fell to a lesser degree, offsetting increased exports of cotton, tobacco, horticultural products, and animal products. Horticultural product exports showed the largest gain, but much of this apparent \$1.4-billion increase stemmed from revised procedures for collecting data.

U.S. Agricultural Imports Set Record In 1990 (see p. 6). U.S. imports of farm products totaled \$22.8 billion, up 5 percent from \$21.7 billion in 1989. Larger purchases of competitive commodities, such as cattle, meat, dairy products, fruits and vegetables, and sugar accounted for most of last year's growth. Competitive products now constitute 75 percent of total agricultural imports.

Bulk Agricultural Exports Fall During 1990

U.S. agricultural exports fell nearly \$600 million to \$39.3 billion, their first decline in 4 years. Wheat exports fell \$2 billion, and other grains fell to a lesser degree, offsetting increased exports of cotton, tobacco, horticultural products, and animal products. Horticultural product exports showed the largest gain, but much of this apparent \$1.4-billion increase stemmed from revised procedures for collecting data.

Exports fell for the first time since 1986, ending several years of strong recovery. Exports had fallen from record highs during the first half of the 1980's, but recovered because of more favorable trends in exchange rates, economic growth overseas, and new U.S. farm policies adopted after 1985. Following a 1988 drought, U.S. exports benefited from the U.S. ability to export from stocks in response to higher prices. However, as U.S. production subsequently rebounded, prices slipped, and increased production overseas limited U.S. export volume during 1990.

The largest decline during 1990 came in wheat exports, which fell 9 million tons. At 27 million tons, wheat exports were their lowest since 1986. Exports fell as record world wheat production increased competition and drove prices down during the last half of 1990. U.S. wheat exports to China fell 3.7 million tons, the biggest decline in shipments to any one customer. Slowed economic growth in China, efforts to restrain foreign exchange expenditures, and increased grain production there all helped China cut wheat purchases from the United States.

Exports were also lower to the Soviet Union following an improved harvest there and in the European Community (EC). The EC is a competing exporter to the Soviet market and aggressively subsidizes exports of surplus wheat. EC competition also hindered U.S. wheat sales to the Middle East and North Africa, while U.S. exports to Pakistan and Bangladesh fell as local food grain supplies improved.

Corn exports fell 4.4 million tons to 52 million tons, with the Soviet Union accounting for most of the drop. In 1989, the Soviet Union purchased a record 19 million tons of corn, but the substantially improved harvest of 1990 and difficulty in acquiring foreign exchange drove sales lower in the last half of 1990.

U.S. corn exports in 1988 and 1989 had been sustained by strong sales to the Soviet Union. In 1988,

poor Soviet grain production boosted purchases from the United States. The following year, Soviet grain production rebounded from 195 million tons to 211 million tons, but Soviet producers became increasingly reluctant to market grain to the Government. As a result, corn imports remained strong. With a 24-million-ton increase in Soviet grain production in 1990, the Government's domestic grain procurements rose, postponing the need for additional grain imports.

Another development reducing Soviet grain purchases during 1990 was reduced availability of foreign exchange. The USSR's convertible currency trade balance became negative in 1989 as energy exports stagnated and Soviet imports rose. Soviet borrowing increased, and by 1990, mounting delays were widely reported in Soviet payments for trading credits. Prompt payment in years past made the Soviet Union an apparently good credit risk, but exporters and commercial banks became reluctant to extend additional credit. In many cases, sellers reportedly refused to advance further sales until previous debts were settled. Several governments made credit available to the USSR, including \$1 billion of USDA GSM-102 credit guarantees late in 1990. However, sales under this offer did not begin until 1991.

Soybean, Soybean Meal, and Cotton Exports Rise

Export volume was higher for soybeans and soybean meal in 1990, but the recovery of U.S. production from drought drove prices lower. Lower prices more than offset increased volume, and value fell \$393 million for soybeans and \$201 million for soybean meal.

Meal exports increased despite smaller sales to the EC. EC imports shifted from meal to beans as lower prices increased the profitability of crushing. Sales to the USSR remained well above 1 million tons, and shipments rose to Latin America, the Philippines, and Eastern Europe.

Cotton exports climbed as tighter supplies overseas led importers to the United States. Supplies were relatively tight in the United States as well, and prices rose. Cotton export value rose \$532 million as a result.

Real Exports Lower

The \$600-million decline in total export value reported for 1990 represents only a 1.5-percent annual decline. However, changes in the global economy during the 1980's and changes in U.S. reporting procedures for

trade data mean export performance has actually been poorer than this marginal decline might imply. At \$39.3 billion, U.S. agricultural exports are only 10 percent below their 1981 peak value of \$43.3 billion. However, due to continued inflation in the rest of the economy, which has not been matched in the agricultural sector, this small nominal difference is much larger in real terms. The U.S. Consumer Price Index (CPI) indicates prices for a typical basket of goods have risen a cumulative 44 percent since 1981, the year agricultural exports peaked in value. Therefore, 1981 exports in inflation-adjusted 1990 dollars totaled \$62.4 billion. This means 1990 exports were about 37 percent below 1981's record in real terms.

1990 marks the first year under revised procedures for collecting data on U.S. exports, agricultural and non-agricultural, to Canada. The value reported by the U.S. Government for exports to Canada has been smaller than the value reported by the Canadian Government for imports from the United States. During the 1980's, this undercounting spread and by 1989 about 40 percent of all U.S. agricultural products exported to Canada were not included in official U.S. trade statistics. Beginning in January 1990, the U.S. Government used adjusted Canadian import statistics to measure U.S. exports to Canada. Since earlier data were left unrevised, this change accounted for much of

the large increase reported in U.S. agricultural exports to Canada during 1990. Exports totaled \$4.2 billion in 1990, \$2 billion more than was reported for 1989.

Based on the apparent degree of undercounting in previous years, \$1.6 billion of the \$2-billion increase was probably due solely to the change in reporting. The remaining \$400 million represents an actual increase in the amount of U.S. agricultural products shipped to Canada. Since 1989's exports to Canada totaled \$2.2 billion, the \$400 million represents an 18-percent increase. Although Canada's economy slowed during 1990, the exchange rate between the U.S. and Canadian dollar was favorable for U.S. exports.

If the reported value of U.S. agricultural exports were adjusted downward to account for revised reporting procedures, then exports totaled \$38 billion during 1990 compared with \$40 billion in 1989. Exports fell \$2 billion in 1990 compared with \$600 million on an adjusted basis. But in each case, the decline is relatively small in percentage terms, 5.5 percent when the data are adjusted and 1.5 percent for the unadjusted data reported in the appendix tables. (Stephen MacDonald, Commodity and Trade Analysis Branch, (202) 219-0822)

U.S. Agricultural Imports Set Record in 1990

U.S. imports of agricultural products advanced nearly 5 percent to \$22.8 billion, paced by larger purchases of competitive commodities, which rose 10 percent to \$17.2 billion. Competitive items now account for a record 75 percent of total farm product imports compared with 72 percent a year earlier and 65 percent 5 years ago.

Strong import growth occurred for live cattle, beef, dairy products, fresh fruits, fruit juices, vegetables, sugar, and malt beverages. Wheat imports from Canada doubled to 630,000 tons due to quality problems with U.S. spring wheat. U.S. imports of live cattle jumped sharply to a record 2.1 million head as imports of feeder steers from Mexico and fed cattle from Canada soared. Fresh fruit imports rose 18 percent in value to \$807 million, mainly due to increases for Chilean grapes, Central American and Caribbean pineapples, and Mexican strawberries. Orange juice import volume gained 21 percent over last year, but higher prices resulted in a value increase

of 45 percent to \$641 million (see appendix table B-3). Substantially higher prices slowed fresh vegetable import volume, especially for Mexican tomatoes, cucumbers, and peppers.

Noncompetitive agricultural imports fell 9 percent in value to \$5.5 billion, mainly from lower coffee prices. Coffee volume remained mostly steady at 1.2 million tons, while value declined 21 percent to \$1.9 billion following the suspension of export quotas by the International Coffee Organization in July 1989. Crude natural rubber imports dropped 8 percent due, in part, to stagnant or reduced industry demand. Rubber prices continued to decline, causing a 26-percent plunge in import values.

Consumer demand for bananas, however, remained strong, resulting in a 6-percent increase in import volume during 1990. Prices also rose, producing an 8-percent value gain to \$938 million. The largest exporters were Ecuador, Costa Rica, Honduras, Colombia, Guatemala, and Mexico. (Thomas A. Warden, Commodity and Trade Analysis Branch, (202) 219-0822)

Get these timely reports from USDA's Economic Research Service

These periodicals bring you the latest information on food, the farm, and rural America to help you keep your expertise up-to-date. Order these periodicals today to get the latest facts, figures, trends, and issues from ERS.

Agricultural Outlook—Presents USDA's farm income and food price forecasts. Emphasizes the short-term outlook, but also presents long-term analysis of issues ranging from international trade to U.S. land use and availability. 11 issues. 1 year: \$26; 2 years: \$51; 3 years: \$75.

Farmlife—Current, fact-filled articles focus on economic conditions facing farmers, how the agricultural economy is changing, and the causes and consequences of those changes for farm and rural people. 11 issues. 1 year: \$12; 2 years: \$23; 3 years: \$34.

National Food Review—Offers the latest developments in food prices, product safety, nutrition programs, consumption patterns, and marketing. 4 issues. 1 year: \$11; 2 years: \$21; 3 years: \$30.

Economic Indicators of the Farm Sector—Updates economic trends in U.S. agriculture. Each issue explores a different aspect of income and expenses: national and State financial summaries, production and efficiency statistics, and prices of production for livestock and dairy and for major field crops. 5 issues. 1 year: \$14; 2 years: \$27; 3 years: \$40.

Rural Development Perspectives—Ours, non-technical articles on the results of new rural research and what those results mean. 3 issues. 1 year: \$9; 2 years: \$27; 3 years: \$37.

Rural Conditions and Trends—Tracks rural events: macroeconomic conditions, employment and underemployment, industrial structure, earnings and income, poverty and deprivation. 4 issues. 1 year: \$14; 2 years: \$27; 3 years: \$39.

The Journal of Agricultural Economics Research—Technical research in agricultural economics, including econometric models and statistics focusing on methods employed and results of USDA economic research. 4 issues. 1 year: \$9; 2 years: \$15; 3 years: \$21.

Foreign Agricultural Trade of the United States—Updates the quantity and value of U.S. farm exports and imports, plus trade trends. 9 issues. 1 year: \$23; 2 years: \$40; 3 years: \$72.

Situation and Outlook Reports—These reports provide timely analyses and forecasts of all major agricultural commodities and related topics such as finance, farm income, land values, and world and regional developments. Each Situation and Outlook title includes: 1 year: \$12; 2 years: \$22; 3 years: \$33. Titles include:

Agricultural Crops	Aquaculture	Fruit and Tree Nuts	Livestock
Agricultural exports and imports	Cotton and Wool	Oil Crops	Vegetables and Commodities
Agricultural Resources	Dairy	Rice	Wheat
Agriculture and Trade Reports	Feed	Sugar and Sweeteners	World Agriculture

Also available: **Livestock and Poultry**. 1 year: \$17; 2 years: \$31; 3 years: \$48.

Livestock & Poultry Markets Quarterly. 1 year: \$15; 2 years: \$29; 3 years: \$42.

U.S. Agricultural Trade Markets Quarterly. 1 year: \$15; 2 years: \$29; 3 years: \$42.
